Spark Result Update Reports – Rebooted!

Outlining the framework from our desk

In our new, rejuvenated approach to publishing fundamental research ideas, we aim to balance a traditional, time-tested framework with a contemporary and, hopefully, refreshing approach to stock-picking. Accordingly, our Result Update reports will be presented in four sections: **(1) Business Assessment Scores, (2) Valuation Framework, (3) Decision Tree, and (4) Stock Buzz & Influencing Factors.**

This report is underpinned by three key beliefs: (1) business assessment should be separated from valuation frameworks, allowing equity research to objectively calibrate the mix when making stock calls; (2) the decision tree we publish makes this process simple and objective, highlighting the three major factors that underpin our recommendation; and (3) reactions to "buzz" and other factors that influence price action must be identified and given due regard when timing stock calls, particularly in the current environment, where information flow is incessant.

Business Assessment Scores

To assess whether a company's business can emerge as a long-term winner, we draw on Porter's Five Forces framework to examine key aspects such as revenue models, pricing risks, market positioning, and competitive moats. Our financial analysis and estimates are anchored in our assessment of both the company's current performance and its long-term potential. To ensure that this assessment remains objective and is not influenced by subjective judgment, we employ a scoring model that captures the key drivers of business quality across five composite vectors. The resulting scores form the basis of our call on the business.

Valuation Framework

We have often observed how markets can make target multiples seem to emerge like the proverbial rabbits out of a hat. To avoid the temptation of retrospectively justifying valuations in line with the broader market, we returned to first principles while designing our Valuation Framework. Anchored in market, peer, and historical absolute benchmarks, our valuation scores incorporate Economic Value Added, return profiles, growth prospects, and leadership positions, mapped against relevant valuation multiples. Ultimately, the central question remains: given everything we know about the business, markets, and peers, does the current pricing appear attractive? This question forms the bedrock of stock-picking in equity research.

Stock Buzz & Influencing Factors

The Buzz Chart & Liquidity Chart track stock-specific news flow, events, and market activity to help identify periods of elevated attention or sentiment shifts, complementing fundamental and valuation analysis.

Decision tree

A schematic view of what we hinge our stock recommendation on. In our opinion, a discerning investor can identify the essence of our pitch from a limited, yet reasonably exhaustive, set of factors that can be organized as branches of a tree. The decision tree we publish makes this process simple and objective, highlighting the three major factors that underpin our recommendation.

Q2FY27 Conference Call – Key Takeaways

Core Business

- Revenue stood at Rs. 341 cr, up 14% Y-o-Y and 12% Q-o-Q. Gross margin improved by ~8 percentage points to 39%, led by the normalisation of high-cost inventory, better volumes and a favourable product mix.
- The quarter included an expected credit loss provision of ~Rs. 5 cr and a merger-related impairment of ~Rs. 5 cr, both one-time in nature. Excluding these, EBITDA before other income would have been ~Rs. 34 cr, compared with the reported Rs. 24 cr. Power and fuel costs were ~30% higher Y-o-Y.
- Working capital declined from March 2026 levels, with receivable days also improving. H1 operating cash flow remained positive.
- Management aims to sustain gross margins at ~35%, supported by product mix. Injectables have recovered, while oral formulations continue to face capacity-related constraints. Cefixime pricing has improved only marginally.
- Merger integration is underway across procurement, manufacturing, quality and support functions, with initial synergies expected towards the end of FY27. Duplicate capacities will be rationalised, with Dhanuka operating at 80–90% utilisation and Orchid at ~60%.

7-ACA Project and funding

- The Jammu plant (1,000 MTPA) is scheduled to commence commercial operations in March 2027, with a significant portion of the investment already completed. Pilot technology has been validated, and yields have reached the minimum threshold required for commercialisation.
- The technology partner earns a royalty linked to improvements in raw material costs, aligning both parties towards yield optimisation. Initial production will be directed towards internal consumption, with third-party sales expected to commence subsequently. Management indicated that achieving full utilisation within two quarters of commissioning is unlikely.
- 7-ACA prices were stable in the past few years, unlike Pen-G, while rupee depreciation provides a favourable backdrop. The PLI incentive tenure remains uncertain pending commercialisation, while GST benefits & lower tax outgo from the Jammu facility are likely to accrue.
- The board has approved an enabling fund-raise, although the timeline and mode of fund-raising have not been finalised. The proceeds are intended to fund the 7-ACA project cost overrun arising from commodity inflation, repay debt raised for the Cefiderocol project and finance the Chennai downstream investment, for which approvals are now in place.

Cefiderocol

- The project is at an advanced stage, with commissioning targeted by December 2026, followed by validation and initial batches between January and March 2027. The inauguration is scheduled for January 2027, in the presence of Shionogi and GARDP.
- The India marketing licence is close to being finalised, with management indicating that the partner has agreed to grant the licence. India could account for 30–40% of total consumption.
- DCGI approval is expected within ~six months of completion of manufacturing, subject to a clinical-trial waiver, indicating potential commercialisation around September–October 2027. Manufacturing margin terms remain unchanged, while a separate marketing margin is under negotiation.

Exblifep and AMS

- Royalty and milestone receipts are currently running at US$3–4 mn annually. The new Latin America licensing agreement, which excludes Brazil and covers select markets in the region, has an estimated 10-year value of ~US$80 mn, adding to the earlier Russia deal. Product registration is expected to take 20–24 months.
- Three to four additional licensing agreements are expected over the next two quarters, covering markets across Australia, Southeast Asia, Japan, Latin America and North Africa. The US opportunity remains at a preliminary stage, with no defined timeline.
- The UK is the only major European market among the Big Five where sales have yet to commence, with procurement structured around guaranteed volumes. Launches in the Middle East and South Africa are expected by Q1CY27. The European patent is valid until 2034, with the German patent extended to November 2036.
- AMS business's EBITDA drag has narrowed. Its portfolio comprises 15 products & 18 SKUs, with 120 hospitals placing regular orders out of ~400 hospitals reached. Business is growing at 10–15% Q-o-Q.

Rating
ACCUMULATE

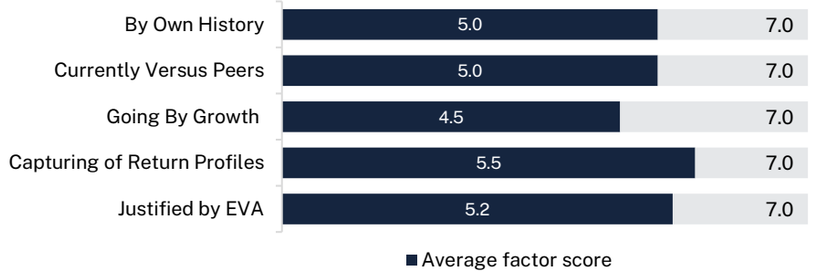

Orchid Pharma - Our Commentary On Results

- Net sales grew 14% Y-o-Y to Rs. 341 cr and 12% Q-o-Q from Rs. 304 cr, marking a sequential recovery following the weak Q1.
- EBITDA increased to Rs. 24 cr from Rs. 3 cr in Q2FY26 and Rs. 14 cr in Q1FY27, with the EBITDA margin expanding 604 bps Y-o-Y and 247 bps Q-o-Q to 7.1%. Gross margin expanded 828 bps Y-o-Y to 38.9%; however, much of the improvement was absorbed by other expenses, which rose 36% Y-o-Y to 22.6% of revenue (+358 bps). Employee costs remained flat Y-o-Y at 9.2% of revenue. Q2FY27 is also the first quarter to include Synmedic's formulations business, which is not reported separately; hence, the Y-o-Y cost comparison is not entirely like-for-like.
- PAT stood at Rs. 29 cr, compared with loss of Rs. 1 cr in Q2FY26, translating into a PAT margin of 8.4%. Other income of Rs. 18 cr accounted for about two-thirds of PBT of Rs. 27 cr, with PAT growth significantly outpacing operating improvement.

Decision Tree – Stock call

CMP
~Rs. 931

Rating
ACCUMULATE

1 Reason 1

- Volume and product mix, rather than pricing, are driving realisation. Injectables have recovered, supported by complex sterile products and limited competition, while orals remain under pressure from industry overcapacity. Our estimates assume no pricing upcycle.
- Growth is likely to broaden beyond the base API portfolio. The Dhanuka business, the 7-ACA downstream chain from FY28E and the specialty portfolio (Exblifep, AMS & Ceftaroline) are expected to add new volume streams, with regulated markets commanding a structural premium over ROW.
- We expect revenue to grow from Rs. 1,233 cr in FY26 to Rs. 1,430 cr in FY27E and Rs. 1,903 cr in FY28E, translating into a ~24% FY26–28E CAGR.

2 Reason 2

- 7-ACA backward integration is a key cost lever, enabling the replacement of bought-in KSM from China once the Jammu plant commences commercial operations in March 2027. Initial output will be consumed internally, with third-party sales expected to follow.
- The Dhanuka merger provides a second lever for margin improvement. Integration across procurement, manufacturing, quality and support functions, along with the rationalisation of duplicate capacities, is expected to drive synergies from FY27 and restore the Dhanuka business to profitability.
- We expect EBITDA to rise from Rs. 34 cr in FY26 (2.7% margin) to Rs. 107 cr in FY27E (7.5%) & Rs. 281 cr in FY28E (14.7%).

3 Reason 3

- The integrated sterile platform, spanning fermentation and 7-ACA to fill-finish capabilities and dossiers, all housed within a USFDA-approved Indian manufacturing site, provides a key competitive barrier and now sits within a single listed entity.
- Exblifep builds a licensing platform, while Cefiderocol and US sterile filings deepen regulated-market presence.
- We expect PAT to grow from Rs. 10 cr in FY26 to Rs. 90 cr in FY27E and Rs. 211 cr in FY28E (EPS of Rs. 35.2).
- We see scope for a re-rating as earnings quality improves, with profits shifting from commodity oral APIs to captive 7-ACA, sterile products for regulated markets and licensing income. This should make earnings less cyclical and reduce dependence on Chinese KSM, within a simpler post-merger structure.

Source: Company, and Midas Research

Estimates Update

Context: With the Dhanuka Labs merger effective from FY27 and historical financials restated for the merged entity, our earlier standalone estimates are not comparable. Accordingly, we initiate estimates for the merged entity, with FY27E/FY28E EPS of Rs. 15.0/Rs. 35.2.

	New estimates	
Description	**FY27E**	**FY28E**
Net Sales (Rs. cr)	1,430	1,903
EBITDA (Rs. cr)	107	281
EBITDA Margin	7.5%	14.7%
Adj PAT (Rs. cr)	90	211
PAT Margin	6.3%	11.1%
EPS (Rs.)	15.0	35.2

- **Estimates Initiation:** We initiate estimates for the merged entity, projecting FY27E/FY28E revenue of Rs. 1,430/1,903 cr and EBITDA of Rs. 107/281 cr, respectively. EBITDA margin is likely to recover from 2.7% in FY26 to 7.5% in FY27E, a transition year, and further to 14.7% in FY28E, led by the commissioning of the 7-ACA facility.
- **Multiple Update:** We value the stock at 28x FY28E P/E, factoring in the benefits of 7-ACA integration and a shift towards sterile products, regulated markets and licensing income, which are expected to improve earnings quality and reduce cyclicality. RoE is expected to improve from 5.6% in FY27E to 12.0% in FY28E.

Valuation Summary

Target Multiple	Target EPS	1Y TP	1Y Upside (Incl. Dividends)
28x FY28E P/E	**~Rs. 35.2**	**Rs. 986**	**6%**
Merged entity	FY28E EPS	Incl. dividends	From CMP

What Changed: The Dhanuka Laboratories Amalgamation

One Orchid: NCLT scheme effective 10 Jul 2026, appointed date 1 Apr 2024 - FY25/FY26 restated

BOARD APPROVAL	NCLT SANCTION	EFFECTIVE DATE	NEW SHARES LISTED
6 Dec 2023	5 Jun 2026	10 Jul 2026 (appointed 1 Apr 2024)	23 Sep 2026

The Business Absorbed

- Dhanuka Laboratories Ltd. (DLL) is the Group's unlisted pharma arm, operating since 1998 and already under common promoter control with Orchid.
- It is a leading cephalosporin antibiotics player across emerging markets, with a presence in both APIs and finished dosage formulations, primarily serving ROW markets.
- DLL operates two API facilities – a cephalosporin plant and a non-penicillin, non-cephalosporin (NPNC) facility commissioned in 2018 – along with an NPNC formulations plant added in 2019.
- DLL reported FY26 revenue of ~Rs. 450 cr (management estimate; unaudited), with structurally lower margins than Orchid's core API business.

What changed in the Reported Numbers

- DLL is no longer a separate entity, with its manufacturing facilities, R&D and dossiers now consolidated into Orchid's standalone accounts from the appointed date.
- FY25 and FY26 standalone financials have been restated, with the FY26 numbers approved on 25 May 2026 subsequently revised.
- Restated FY26: revenue Rs. 1,233 cr, EBITDA Rs. 34 cr (2.7%), PAT Rs. 10 cr, versus FY25 of Rs. 1,398 cr, Rs. 144 cr (10.3%) and Rs. 135 cr
- Q2FY27 is therefore like-for-like: revenue Rs. 341 cr (+14% YoY), EBITDA Rs. 24 cr (7.1% vs 1.0%) and PAT of Rs. 29 cr against a Rs. 1 cr loss
- Combined revenue is net of inter-company sales, leading to a lower merged revenue base than the aggregate standalone revenue of the 2 entities.

Growth and Outlook Implications

- Management guides to a 1–2% EBITDA margin expansion, driven by procurement synergies, elimination of duplicated functions, and lower compliance and administrative overheads.
- Merger creates an integrated anti-infectives platform spanning KSMs to finished dosage formulations, with combined R&D and capacity rationalisation ahead of 7-ACA commissioning in Q1CY27.
- Adds an NPNC API-plus-formulations vertical, diversifying the business beyond cephalosporins. While small today and requiring further development investment, it offers a second growth engine.
- Near-term caveat: DLL's lower-margin business mix will constrain headline margins initially, while synergies are expected to accrue progressively through FY27–28 rather than immediately.

Source: Company, and Midas Research

Merger Terms: 0.92 cr Net New Shares Cut the Public Stake by 4.6 Points

Orchid paid no cash: DLL shareholders, all belonging to the Dhanuka promoter group, received 161 Orchid shares for every 5 DLL shares

SHARE COUNT	PUBLIC STAKE	PROMOTER STAKE	EPS DILUTION
+18.1% (5.07 cr to 5.99 cr)	30.16% to 25.55%	69.84% to 74.45%	-15.3% from share count alone

Share Issue Under the Scheme (CR SHARES)	
Orchid shares before merger	5.07
Less: held by DLL, cancelled	(3.54)
Add: new shares to DLL holders	4.46
Orchid shares after merger	5.99
Net new shares (real payment)	**0.92**

3.54 cr of the 4.46 cr new shares only replace what the family already held through DLL; the other 0.92 cr pay for the DLL business

What Orchid Paid And Received (Rs.cr)	
Net new shares, at Dec-23 price	541-597
Net new shares, at 10-Jul-26 price	**~928**
DLL net assets, excl. Orchid shares	242
DLL bank debt taken on	~124

Share prices: Rs. 590-651 (Dec-23), Rs. 1,013 (10-Jul-26). Also received: two plants, DLL customers and 590 employees

Key Takeaways

- **Promoter holding rose 4.6 pts to 74.45%.**
- **Minority shareholders absorbed ~15% EPS dilution** in exchange for DLL's lower-margin business and ~Rs. 124 cr of debt.
- **Price paid: ~3.8x DLL's net assets** at the effective-date share price
- In return, **related-party trade ends** and Rs. 143 cr of DLL-held 0% OCDs are cancelled
- **EPS falls 15.3%** on the same profit, before counting DLL's results

The information and opinion expressed in this research report do not constitute an offer or an invitation to make an offer, to buy or sell any securities. The securities quoted in this document are for illustration only and are not recommendatory. This research report is provided by Spark PWM on a strictly confidential basis for the exclusive use of the recipient and has been obtained from published information and other sources, which Spark PWM or its affiliates consider to be reliable. None of the research analysts of Spark PWM accepts any liability or responsibility whatsoever for the accuracy or completeness of any such information. All estimates, expressions of opinion and other subjective judgments contained herein are made as of the date of this research report.

This research report does not claim to contain all information that an investor / potential investor may require for the purpose of making an investment. The past performance of a security, product or portfolio does not in any manner indicate the surety of performance in future. Registration granted by SEBI, membership of a SEBI recognized supervisory body (if any) and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors.

This research report also does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Spark PWM also puts together Technical Analysis, and each recipient of this report must note that the views of the Technical Analyst is always based on short term market variables and will be materially different from the views of the other sector/fundamental analyst in Spark PWM, whose research reports are based on fundamental analysis of the subject company. Each recipient of this research report should make such assessment as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this research report (including the merits and risks involved) and should consult their own advisors. This research report is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. The price and value of the investments referred to in this research report and the income from them may go up or down, and investors may realize losses on their investments. Spark PWM does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment. The material is based on information that we consider reliable and may be obtained from third-parties or derived / deducted on the basis of such information. Spark PWM does not represent that such information is accurate or complete.

This research report is not directed or intended for distribution or use by any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject Spark PWM and/or its affiliates to obtain any registration or licensing requirement within such jurisdiction. The research analyst preparing this research report is not registered as a broker-dealer in the United States and, therefore, is not subject to US Rules regarding the preparation of research reports. The Research Analysts contributing to this report are residents outside the United States and are not associates, employees, registered or qualified as research analysts with FINRA or a US-regulated broker dealer. Recipients of this material should keep themselves informed about any such restrictions. The securities described herein may or may not be eligible for sale in all jurisdictions or to a certain category of investors. This material should not be construed as an offer to sell or the solicitation of an offer to buy any securities in any jurisdiction where such an offer or solicitation would be illegal. Recipients shall be solely liable for any liability incurred by them in this regard and will indemnify Spark PWM and/or its affiliates for any liability it may incur in this respect.

Securities markets may be subject to significantly higher risks, and in particular, the political and economic environment, company practices and market prices and volumes may be subject to significant variations. The ability to assess such risks may also be limited due to significantly lower information quantity and quality. Investment in securities market are subject to market risks. Read all the related documents carefully before investing.By accepting this document, you agree to be bound by all the provisions as may be applicable pursuant to it. Nothing contained herein should be relied upon as a promise, representation or an indication of future performance. Certain statements made herein may not be based on historical information or facts and may appear to be "Forward Looking Statements", including those relating to general business plans, future financial condition and growth prospects. The actual results may differ materially from any "Forward-Looking statements" due to a number of factors, including socio, political, competitive environment, force majeure etc. Spark PWM makes no representation or warranty, express or implied, as to the accuracy, completeness or fairness of the information and opinions contained in this research report.

While we would endeavour to update the information herein on a reasonable basis, Spark PWM is under no obligation to update the information. Also, there may be regulatory, compliance or other reasons that prevent Spark PWM from doing so. Neither Spark PWM nor its affiliates or their respective directors, employees, agents or representatives shall be responsible or liable in any manner, directly or indirectly, for views or opinions expressed in this report or the contents or any errors or discrepancies herein or for any decisions or actions taken in reliance on the report or the inability to use or access our service in this report or for any loss or damages whether direct or indirect, incidental, special or consequential including without limitation loss of revenue or profits that may arise from or in connection with the use of or reliance on this report. Opinions expressed herein are our current opinion as of the date of appearing on this material only.

Spark PWM and/or its affiliates and/or employees may have interests/positions, financial or otherwise, in the securities mentioned in this report. To enhance transparency, Spark PWM has incorporated disclosure of interest statement in this research report. This should, however, not be treated as an endorsement of views expressed in this report.

Spark Capital Advisors (India) Private Limited (holding company of Spark PWM) has gone through a process of reorganisation and demerged its institutional equities business (stock broking license and research analyst license) to Spark Institutional Equities Private Limited (Resultant Company) through a Composite Scheme of Demerger ("Scheme"). Further the shares of SIE has been bought by Avendus Capital Private Limited with effect from December 20, 2022.
